

Pharaoh Kipkirui Chirchir

Senior Data Analyst | Business Intelligence Developer | Data Engineer

Nairobi, Kenya | +254 725 674 081 | chirkiruiophero@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Senior Data Analyst and BI Developer with 8+ years of progressive experience delivering end-to-end analytics solutions across private-sector security operations, UN agencies, and international NGOs. Specializes in Power BI (Advanced DAX and M-Query), Snowflake data warehousing, Microsoft Fabric, SQL-based data engineering, and scalable ETL pipeline design. Demonstrated track record of reducing manual reporting effort by up to 75%, cutting operational processing times by 41%, and building data warehouses that serve multi-country stakeholder networks. Microsoft Certified Fabric Data Engineer Associate and Power BI Data Analyst Associate. Experienced at translating complex data into clear, boardroom-ready insights and embedding a data-driven culture across organizations.

CORE COMPETENCIES

SQL (Advanced T-SQL) | Power BI (Advanced DAX) | Microsoft Fabric | Python (pandas, NumPy, scikit-learn) | Tableau | Azure Data Factory | ETL / ELT Pipeline Design | Data Warehouse Architecture | Dimensional Modelling (Star and Snowflake) | Data Governance & Quality | Stakeholder Management | KPI Framework Design | Predictive Modelling | Machine Learning | NLP & Sentiment Analysis | Agile / Scrum | Data Storytelling | Excel (Advanced, Power Query) | Git / GitHub | Jira and Confluence

PROFESSIONAL EXPERIENCE

Senior Regional Business Intelligence Developer

May 2025 – Present

GardaWorld Security · Nairobi, Kenya (Africa & Middle East Region)

- Act as the regional focal point for operational reporting across Africa and the Middle East, designing automated Power BI dashboards that underpin monthly KPI reviews for senior leadership, driving organizational growth.
- Architected and deployed a layered Microsoft Fabric data warehouse (Bronze / Silver / Gold) ingesting Dynamics Business Central and CRM data, reducing orchestration challenges and report preparation time by 75%.
- Designed and implemented scalable ETL pipelines using Power Query and T-SQL, transforming raw operational data into analytics-ready tables and eliminating recurring manual processing.
- Built financial-forecasting dashboards that track regional performance against budget targets, enabling seamless month-end financial monitoring across 12+ country operations, leading to 98% budget achievement.
- Delivered a 6-month Power BI and MySQL training curriculum to 20+ country analysts across Africa and the Middle East, embedding a self-service analytics culture, reducing BI team support requests by 40%.
- Established and enforced data governance standards — including SOPs, data-quality checks, version-controlled deliverables in GitHub, and documentation Cn confluence — ensuring compliance across all reporting pipelines.

Regional Operations Data Analyst

Sep 2022 – Apr 2025

International Organization for Migration (IOM) · Nairobi, Kenya

- Automated Power BI and SQL reporting workflows, reducing manual recurring reporting by 30% and saving more than 70 staff-hours per month across the operations division in Eastern and Southern Horn of Africa.
- Implemented an Exit Permit timeline dashboard that identified processing gaps, reducing permit issuance time by 41% — from 50 days in 2023 to 29 days in 2024 and more stakeholder engagement on refugee processing.
- Delivered interactive Power BI KPI dashboards for donor reporting; evidence-based cost-reduction metrics contributed to a 15% improvement in successful donor funding proposals.
- Conducted root-cause analysis using 5 Whys and PDCA methodology using Python (Random Forest) automation codes, addressing operational bottlenecks and achieving a 20% improvement in key processing throughput.
- Spearheaded a data-strategy symposium with the ICRC and peer organizations, directly influencing data-protection and governance policy at IOM and partner agencies globally.
- Translated complex multi-country datasets into executive-level infographics and reports using Agile (Scrum) delivery, enabling evidence-based resource-allocation decisions for senior management.

Senior Analyst – Case Processing

Sep 2021 – Aug 2022

Church World Service RSC Africa · Nairobi, Kenya

- Implemented 40+ dynamic Tableau and SQL dashboards supporting quality assurance across 15 case-processing departments, improving departmental efficiency by 30%.
- Advised senior management on the reporting framework for refugee processing presentations to the Bureau of Population, Refugees, and Migration (PRM), supporting US government refugee programming across Africa.
- Led the Refugee Management Working Group with the Government of Kenya's Department of Refugee Services to design and deploy an interoperable refugee database shared across partner agencies.
- Managed and mentored a team of 8 Case Processing Assistants, conducting performance reviews, coaching on data techniques, and ensuring quality and throughput targets were consistently met.
- Facilitated monthly coordination reporting with UNHCR, IOM, and donor representatives, providing standardized, auditable updates on RSC processing across all African missions.

Case Processing Analyst

Apr 2020 – Aug 2021

Church World Service RSC Africa · Nairobi, Kenya

- Built a predictive analytics model using Python (scikit-learn) to forecast refugee departure readiness, enabling proactive resource planning across processing teams.
- Led NLP sentiment-analysis of refugee and partner complaints, producing executive dashboards and strategic recommendations that shaped client-engagement policy.
- Supported migration of refugee case data from the legacy system to the new START platform, maintaining data accuracy and integrity throughout the transition for 100,000+ case records.
- Managed ETL pipelines for case-processing datasets using Jupyter Notebook and Power Query, ensuring data quality for downstream Tableau monitoring reports.
- Implemented robust data-governance protocols and SOPs for the ethical management of sensitive beneficiary data in compliance with UN data-protection standards.

Case Processing Assistant

May 2017 – Mar 2020

Church World Service RSC Africa · Nairobi, Kenya

- Improved reporting accuracy by 30% by building a Tableau error-tracking dashboard to monitor and flag case-processing errors in real time.
- Developed a case-processing stage step-down visualization for PRM reporting, illustrating volume trends and drop-off at each processing stage across all African missions.
- Conducted detailed data processing and quality checks across all stages of refugee resettlement, supporting strategic planning and compliance.

Claims Data Analyst

Sep 2016 – Apr 2017

Resolution Insurance · Nairobi, Kenya

- Designed a machine-learning fraud-detection model for medical claims achieving 94% accuracy, minimizing financial risk and supporting medical-provider dispute resolution.
- Performed financial reconciliations and claims-data analysis, streamlining account operations, resolving client complaints, and strengthening compliance in payment processing.

SELECTED PROJECTS

Microsoft Fabric Regional Data Warehouse

2025

GardaWorld Security

- Problem: Fragmented Dynamics BC and CRM data across 12+ country operations; no single source of truth for regional and global BI.
- Solution: Designed a Bronze/Silver/Gold Fabric warehouse architecture; built automated Dataflows and Power BI reporting layer in coordination with the global BI team. Reduced report preparation time by 75% and enabled real-time KPI monitoring across the region.
- Stack: Snowflake, Power BI, T-SQL, Power Query, Dynamics 365, dbt.

Exit Permit Processing Analytics — IOM

2024

International Organization for Migration

- Problem: Exit permit processing averaged 50 days with no visibility into bottlenecks.
- Solution: Built an automated SQL + Power BI timeline dashboard that surfaced processing gaps by stage and officer. Processing time fell from 50 to 29 days (41% reduction) within 12 months.
- Stack: SQL Server, Power BI, DAX

Customer Churn Prediction API

2024

Personal / MSc Project

- Built an XGBoost classifier achieving 88% accuracy on synthetic churn data, with real-time KPI scoring on historical and current churn trends, deployed on streamlit
- Stack: Python, XGBoost, stremlit, scikit-learn | Link: <https://chirchirp-customer-churn-predictive-model-app-2cnvs.streamlit.app/>

A W A R D S

Most Innovative Employee Award — Church World Service RSC Africa, 2022

Recognized for designing automated reporting that reduced processing time by 40% across 15 case-processing departments.

E D U C A T I O N

MSc Data Analytics

Nov 2023 – Dec 2024

Nexford University

- Modules: Machine Learning, Statistical Modelling, Data Engineering, Business Analytics. Capstone: Deployed a real-time churn prediction API using XGBoost and Flask.

BSc Economics & Statistics

Sep 2012 – Nov 2016

Chuka University

- Core modules: Econometrics, Inferential Statistics, Quantitative Methods, Data Collection Methodologies.

C E R T I F I C A T I O N S

- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified: Fabric Data Engineer Associate
- Extended E-Certificate in Leadership & Management — UNSSC
- Career Essentials in Cyber Security — Microsoft and LinkedIn
- Introduction to Business Intelligence — Corporate Finance Institute
- Becoming a Data Analyst — LinkedIn Learning

T E C H N I C A L P R O F I C I E N C I E S

Languages and Query: SQL (T-SQL, MySQL, PostgreSQL), Python (pandas, NumPy, scikit-learn, matplotlib, seaborn), R

BI and Visualisation: Power BI (Advanced DAX), Tableau, Looker, Excel (Advanced, Power Query), SSRS, Matplotlib, Seaborn, Plotly.

Data Engineering and Platforms: Microsoft Fabric, Azure Data Factory, Azure Synapse, Azure Databricks, SSIS, SSAS, Snowflake, BigQuery, AWS (S3, Redshift)

Tools and DevOps: Git / GitHub, Docker, Jupyter Notebook, VS Code, Agile / Scrum, dbt (fundamentals), Flask

Databases: SQL Server (SSMS), PostgreSQL, MySQL, MS Access, BigQuery, Snowflake
